

I wanted to contact you regarding how important I think it is that the LPFM broadcasters do not block radio stations that are providing such a premier service to listeners. In my area, Canyon, Texas we listen daily to 89.1 (KLOVE) at work and I listen at home. When programming is interrupted by a LPFM (opera) station it is frustrating to say the least. There is NO comparison in the quality of broadcasting and service and the broad base of listenership of KLOVE and this very narrow format station. The signal from this LPFM opera station completely drowns out 89.1 at times. Thanks for your consideration in protecting the KLOVE signal. Sincerely, Sharon File
